

LOGISTICS

TOTAL LOGISTICS
SOLUTION WITH
KNOW HOW

About Us

FTE Logistics is a %100 Saudi-owned company that started in 1998 as a small inland transportation establishment which has grown up to become one of the leading providers of heavy haulage and special transportation projects in Middle East with total logistical solutions.

The headquarter is in Dammam which helps accommodate the administration office, vehicle workshop and container storage depot. Vehicles are also operated from a base in Jeddah and Riyadh, which caters for the growing levels of internal movements of various types of cargo.

Mission

To provide a safe and reliable transportation solution along with our installation services keeping in mind customer satisfaction.

Vision

To offer unique logistic services with the know how in Saudi Arabia matching with the Saudi vision of 2030.

Values

Our values reflect our thoughts and belief. They recognize our organization culture as team's player in the organization.

Safety

Safety is key priority and non-negotiable term in our scope.

Reliability

We are the strategic and trusted partner that you can always depend on.

Excellence

We are providing a service with high quality standards matching customer expectations.

Integrity

We are always serving our clients honestly with high commitment to business ethics and human moral.

Logistics Services:

FTE offers various services which includes customs clearance, transportation, open yard storage, heavy haulage, heavy lift, project feed study, equipment rentals among many of the services provided to our various clients.

Heavy Haulage

FTE Heavy lift with its wide range of equipment from extendible trailers, modular trailers or the self-propelled trailers have been moving several types of equipment/cargo with various odd dimensions and weight. We have been offering reliable and safe logistical solutions to our clients through our well experienced and professional team. The heavy haulage team with its vast experience have the ability of handling huge projects safely keeping in mind the compliance of our clients.

Heavy Lift

FTE Heavy lift has its own fleet of heavy lifting equipment that can lift and install heavy cargo ranging from 10 to 750 tons capacity. Our heavy lift fleet is supported by modern equipment to handle various lifting / installation jobs for different clients of various industries

General Haulage

FTE's general haulage team continues to deliver the general cargo swiftly and on time all over the kingdom regardless of the destinations from where the cargo has to be picked or delivered. This has helped FTE build its reputation with large clients as all of its fleet is properly maintained, checked regularly and the team being able to provide a live update of where the trucks are exactly with the cargo as all of its trucks are fitted with GPS system.

FTE CREATES NEW BENCH

The project which is one among the many Saudi government gas plants, involves the construction of a new gas treatment plant that helps in the recovery of ethane, propane and other natural gas liquids from 1.5 billion SCFD of sales gas keeping in mind the vision of the kingdom for 2030.

The De-Methaniser column measuring at 74m length, 9.5m wide, at a height of 9.5m and weighing at 876 MT forms the centre stage of this new facility. Along with the equipment used for the movement, the total weight reached 1156 MT

The total route from Jubail Industrial Port to the project site spanned over 270 kms which was carefully surveyed, proposed and accepted by the local government bodies such as MOT (Ministry of Transport), RC (Royal Commission of Jubail), SCECO (Saudi Electric Company), SAR (Saudi Railways), GCC Interconnection authority, Civil works department, SADARA, Military and Traffic police

CHALLENGE IN THE KINGDOM

For FTE to carry out the complex movement from port to site, we had to face various challenges such as

- » Change the driving direction 6 times to meet the proposed route which was meant to cross 3 busy highways
- » Slopes of %7 had to be traversed for which we had to use additional 3 prime movers
- » 9 overhead electric cables had to be shut down and lifted
- » 4 bypasses were constructed to avoid certain obstacles

- » 22 lamp posts were removed
- » 3 road slopes were reduced to meet the trailer stroke limits

FTE was contracted to perform the transport of all heavy equipment for this project which came to a total of 10,000 MT which was carried out between the period of 12 months spanning between March 2018 to March 2019.

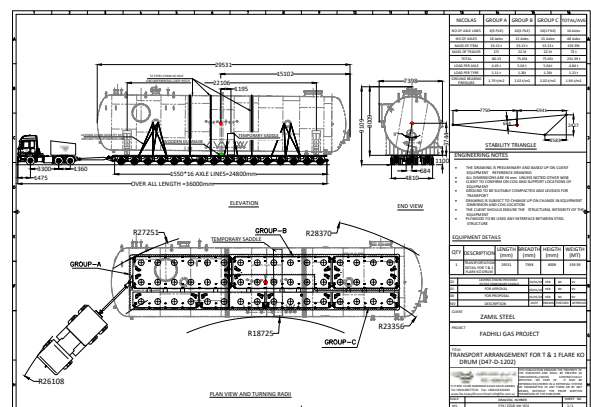

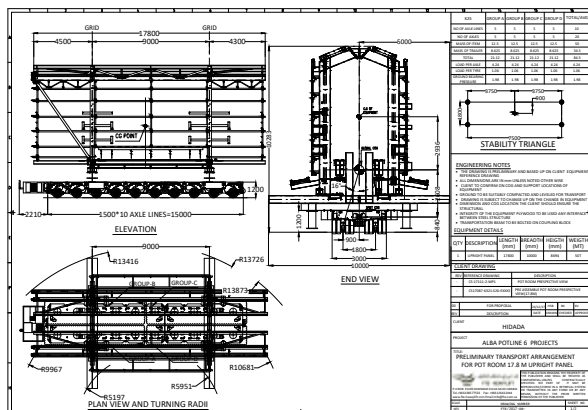

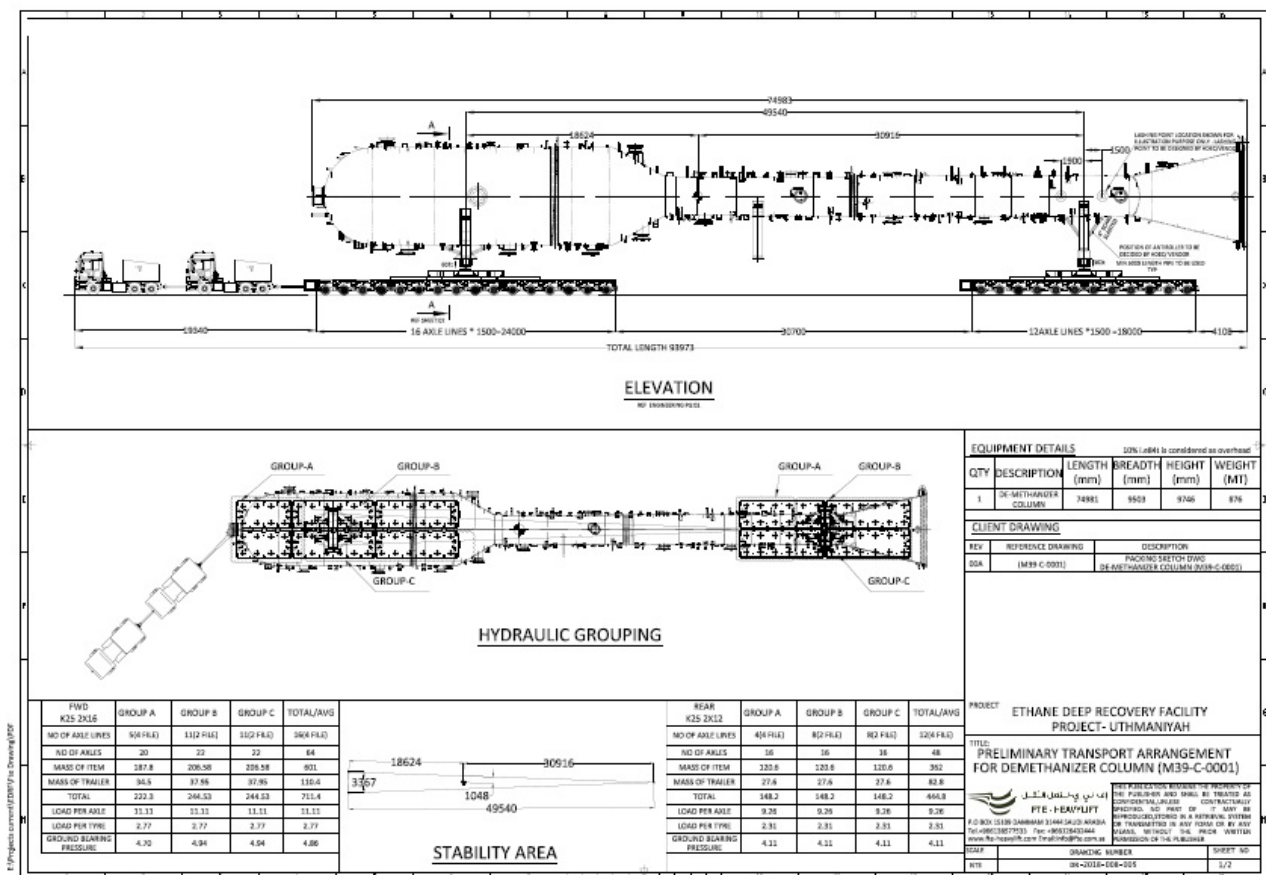

Customs clearance service

We provide custom clearance service from all ports in Saudi Arabia for all our clients. We can arrange applications for customs duty, exemption preparation, chemical permits and attestation of documents from various government authorities among the many other services in customs clearance ensuring a smooth clearance for your shipments.

Our aim is to develop timely solutions for customs clearance and delivering the goods in a safe manner.

Project Feed Study

We have an expert team that studies the requirements, safety procedures and the most cost effective methods needed before carrying out a project. This study it is the starting point for any large-scale or major investment project. A study that identifies key deliverables at each phase of the project. The information gathered by such a study is critical to the success of a project being delivered on time and on budget. This service is provided to any client looking to invest for upcoming projects.
